## Water Quality: Best Management Practices for Ready Mixed Concrete and Aggregates Industries

*FREE One-day training sessions  
January 12, 2010 & January 13, 2010  
from 8:30 am—3:30 pm*

# Best Management Practices for the Ready Mixed Concrete and Aggregates Industries

## *Training Dates*

All sessions are from 8:30 am—3:30 pm

- January 12, 2010, Plaza Hotel, 1718 Underpass Way, Hagerstown, MD 21740
- January 13, 2010, Ashland Café, 10810 York Road, Cockeysville, MD 21030

Each participant will receive a training toolkit binder along with a CD of all presentations and other valuable information for future use. For more information, or to enroll in this class, please contact April Thompson, MCET at 301-934-7500.

## *Background*

The Maryland Center for Environmental Training (MCET) received an Environmental Protection Agency (EPA) grant in Source Protection to work with small to medium-sized ready mixed concrete and aggregate operations in the State of Maryland. The goal was to develop training materials on industry best management practices (BMPs) related to water quality.

Over the grant period, MCET worked with and would like to thank the industry representatives from: Chaney Enterprises, Lafarge North America, Reliable Contracting, Inc., National Ready Mixed Concrete Association, and the National Stone, Sand & Gravel Association who spent time with us in the field and providing feedback on the training materials that were developed during the grant period. MCET would also like to thank representatives from EPA's headquarters office, Region 1 office and their Region 3 office for providing their feedback on the materials.

Working with these industry representatives, MCET staff visited smaller operations where the company had both aggregates and ready mixed concrete either on-site or close by. The training materials developed represents areas of interest to these companies and are captured in six training modules, which in turn can be broken out into distinct segments.

## *Topics Covered*

- Clean Water
- Impairments to Water Quality
- Compliance with Stormwater Regulations
- Best Management Practices for the Ready Mixed Concrete Industry
- Best Management Practices for the Aggregates Industry
- Developing a Stormwater Pollution Prevention Plan (SWPPP)

The College of Southern Maryland maintains a policy of equal opportunity for all persons.

*Funded by the Environmental Protection Agency under grant # X9-973590-01*
